OUR BUSINESS STRATEGY

PLAN

We develop a comprehensive roadmap by identifying client needs and industry challenges. Research market trends and competitors to align solutions. Define clear goals, resource allocation, and timelines. Engage stakeholders to ensure alignment on strategic objectives, ensuring a proactive approach to minimize risks.

IMPLEMENT

We execute the planned strategy with precision by assigning roles, streamlining workflows, and ensuring effective communication across teams. Utilize technology and process automation for efficiency. Monitor progress closely, ensuring timelines are adhered to, and adjust operational priorities when necessary to ensure seamless delivery of industrial solutions.

EVALUATE

We regularly assess the effectiveness of the implemented strategy by tracking key performance indicators (KPIs). Solicit client feedback, review operational data, and compare outcomes with predefined goals. Analyze strengths, weaknesses, and potential opportunities for improvement to ensure the company meets or exceeds performance expectations.

IMPROVE

We continuously refine processes by incorporating insights from evaluations. Implement innovations to enhance efficiency, client satisfaction, and solution delivery. Address gaps, update technologies, and develop team capabilities through training. Foster a culture of continuous improvement, ensuring long-term success in delivering cutting-edge industrial solutions.

Energy Management

INTRODUCTION

In recent years, by the rise of environmental awareness and the impact of high energy prices, energy-saving carbon reduction has become a universal value. Also create a hot energy saving market trends. Solar energy is the world's first choice for green energy, therefore, ARGO will be your indispensable partner in establishing a Energy Management system.

PV Monitoring & Prediction Management System

1. Monitor

- Informative dashboard to visualize a large number of distributed solar power plants.
- Fully customizable to build dashboard, reports, indicators, alerts, formulas for business need.
- Solutions by role, no wasting time in pulling reports.

• Site Overview

2. Forecast

- Cutting-edge machine intelligence (AI) over unstructured data(sensors, images, videos, human behaviors, etc.)
- The best algorithm (deep-learning-based) to predict PV production.
- Pre-alarm for equipment maintenance, eg. inverters, data loggers.
- Predictive risk scores and potential loss.
- Turn your sensor streams into profitable decisions.

INPUT: Weather Forecast, Inverter, Radiation

Machine Intelligence Engine

OUTPUT: Forecast for the next 5/10/ 15 minute periods

• Baseline of PV Power Generation Forecasting Model

3. Operation and Maintenance

- Push notification to mobile for instant events
- Knowledge based service guidance
- Issue tracking system and intervention scheduling
- Human resources optimization
- Easy to use mobile application for operation record

• Operational Record through mobile client to establish expert system

HARDWARE PRODUCTS

Photovoltaic Inverter • Energy Storage System • UPS • Active Power Filter

APPLICATIONS

- Island Electrical System
- Hybrid and Storage System
- Power Grid System
- Trading

Building Automation

INTRODUCTION

AGRO has continued in integrating technology and source to make Building Automation more completely. Compared with traditional BA projects, AGRO's BA can be more integrated with data collection, analysis and control. AGRO optimizes the BA with innovation applications.

APPLICATION

Hotel School Home

ADVANTAGES

- High reliability, and longer warranty
- Integrated data sharing
- Hardware devices sharing to reduce operating expenses
- Avoided double investment to reduce investment costs
- Integrated wiring to reduce maintenance costs
- Single system, and command unity
- Standardized and scalable

FEATURE

- 1 Doorlock Integration Control**
 - Door Status - Open or Close
 - Door Open Alarm
 - Remote to Open the Door
- 2 Electrical Power Detection**

Switchable Privacy Glass

INTRODUCTION

Switchable Privacy Glass is a magic glass which can be transparent or opaque through your control. It is suitable for conference room, hospital (nursery, emergency room, ICU, operating room), shower room, privacy area, and being a projection screen. It can also be used on building as a security window, on car as a sunroof, on yacht, train and other transportation as windows.

FEATURES

- Fast and Easy to Switch Glass Transmittance for Privacy
- Flexible Lighting Adjustment

ADVANTAGES

- 1 IP68 Waterproof & Dustproof**
- 2 Snowproof & High Temperature Resistant**
- 3 High durability**
- 4 Remote Control System**
- 5 Energy Saving**
- 6 As a Projection Screen**

Video Surveillance

INTRODUCTION

We collect the image and video, customer characteristics, and consumer behavior for further analysis. No matter when and where, we can ensure data accuracy and stability, and provide owners a wide range of customized reports immediately. The owners can deal with the shop operating mode and employee performance following the reports. It could achieve the best sales results and bring more loyal customers for the store.

SYSTEMS

- Building monitoring system
- Business people flow analysis system
- Remote browsing

ADVANTAGES

1 People-Flow Analysis

- Numbers of people-flow
- Checkout line numbers
- Waiting time

2 Hot-spot Analysis

- Customer staying position map
- Customer shopping direction analysis

3 Face Detection and Recognition System

- Gender analysis
- Age analysis
- Time of staring at goods analysis
- Browsing time in shop analysis

4 Identity Verification System

- Whitelist of customer
- Blacklist of customer

4 Staff optimization
